Professional Summary

Motivated and enthusiastic Bachelor of Computer Application (BCA) graduate with strong knowledge of C, C++, Java, Python, MySQL, HTML, CSS, and JavaScript. Having excellent problem-solving skills, a passion for software development, and a strong willingness to learn emerging technologies. Looking for an opportunity to contribute technical skills and grow professionally in a dynamic IT organization.

Technical Skills

Programming Languages: C, C++, Java, Python, HTML, CSS, JavaScript
Database: MySQL, MongoDB
Libraries & Frameworks: Spring, Django, JSP, Servlet, React.js, Node.js

Projects

Vehicle CNG Booking Application *Java, JSP, Servlet, MySQL, HTML, CSS, JavaScript*

- Developed a web-based Vehicle CNG Booking Application using Java, JSP, Servlets, MySQL, HTML, CSS, and JavaScript.
- Designed responsive user interfaces for Admin, CNG Pump Owners, and Users using HTML, CSS, and JavaScript.
- Implemented user authentication, registration, and role-based login using Java Servlets and JSP.
- Integrated MySQL database to manage user details, CNG pump information, booking records, and fuel inventory.
- CRUD operations are implemented to manage users, CNG pumps, bookings, and profile information.
- Improved application security through server-side validation and session management.

E-Commerce Application *Python, Django*

- Developed an E-Commerce web application using Python with a user-friendly interface for online shopping.
- Featured features implemented such as user registration, login authentication, product listing, and cart management.
- Designed and managed the backend logic for storing and retrieving product and customer information.
- Integrated database operations for efficient data management and order processing.
- Applied problem-solving and debugging skills to ensure smooth functionality and improve user experience.
